

BizTalk 2013 Workshop

Siddhis Career Development Center

trainings@siddhiscdc.com

Premier Workshop

Become BizTalk expert in 4 days

Overview

This 4 day workshop for Software Developers will include an overview of Microsoft BizTalk 2013 Server along with presentations and

hands-on labs covering how to design, build, and operate a robust, scalable and BizTalk 2013 Enterprise Integration Solutions.

Target Audience

This workshop is designed for architects, administrators, developers and support personnel, who are new to or moderately familiar with BizTalk 2013 Server.

Students who have interest in BizTalk will also probably find

this class useful for learning the new concepts and features. This training has topics which will be valuable to architects, and engineers supporting a production BizTalk environment.

Agenda

•••

Day 1:

- Introduce BizTalk, installing and configuring BizTalk, architecting a highly available and Scalable BizTalk Environment, explaining few real time implementation designs, BizTalk Components like Schemas, Maps, Ports, and Pipelines.

Day 2:

- Managing and Deploying Applications in a BizTalk Server Environment and Admin Tools, Implementing Business workflows using Orchestrations using MSMQ, WCF-SQL, SOAP etc. adapters, deploy, testing sample projects.

Day 3:

- Implementation of complex scenarios using EDI, RNIF, Party, Roles, WCF services, SSL, Correlation, BRE etc.

Day 4:

- Administer a BizTalk Server Environment and troubleshooting performance and common issues in BizTalk 2013 Server

What You Will Learn?

This workshop will combine presentations with plenty of hands-on labs covering various architecture and administration areas of BizTalk 2013 Server including installation and configuration of the product, deployment of BizTalk solutions, management of the environment, and design of a scalable and highly available BizTalk environment.

In addition, you will also learn how to detect performance issues, as well as troubleshoot common issues. At the end of the workshop you should have a good knowledge of architecting and administering BizTalk Server 2013 solutions as well as able to troubleshoot and identify common issues that you may encounter.

Course Content (with Practical Demos)

- **INTRODUCTION TO BIZTALK SERVER 2013**
- **CREATING SCHEMAS**
- **CREATING MAPS**
- **DEPLOYING A BIZTALK PROJECT**
- **ROUTING BIZTALK MESSAGES**
- **CREATING PIPELINES**
- **INTEGRATING WITH ADAPTERS**
- **CREATING A BIZTALK ORCHESTRATION**
- **AUTOMATING BUSINESS PROCESSES**
- **INTEGRATING WITH WEB SERVICES, WCF Services**
- **DEPLOYING AND MANAGING BIZTALK APPLICATIONS**
- **INTEGRATING BUSINESS RULES**
- **ADMINISTRATION & MONITORING**

Siddhis Career Development Center provides quality training with more practical scenarios, supported with live projects which are carefully planned and provide students with the real world industry scenario.

The objective of the program is to equip Young professionals with industry oriented knowledge and make them productive right from the start and to meet the increasing demand for skilled resources from organizations across the country.
